

Industrial Growth Platform, Inc.

IGPI Singapore partners with FPT Software to support digital transformation in Southeast Asia

Singapore, [October 25, 2021] – Industrial Growth Platform Pte. Ltd. (IGPI Singapore) has partnered with FPT Software Company Limited (FPT Software), Vietnam’s largest tech firm, in order to support digital transformation (DX) for corporates, governments, institutions, and any relevant organizations in Southeast Asia.

Since its establishment in 1999, FPT Software has grown to be the largest technology and digital transformation services provider in Vietnam. Since then, it has helped several individuals, businesses and organizations across multiple sectors worldwide increase competitiveness by leveraging its digital capability and industry know-how.

In Southeast Asia, there is a large variation in services for the middle class and local industries are fragmented with too many players which caused business inefficiencies and volatilities in products and services quality. IGPI Singapore and FPT Software will support the creation of a platform focusing on ASEAN DX for Japanese companies to invest and support industrial reform by combining IGPI’s business revitalization and industry transformation know-how and FPT’s knowledge of the Vietnam market, local connections and digital transformation know-how.
